

In order to facilitate electronic searches of our articles and to help readers who may be scanning our journals or Tables of Contents for articles of interest, we ask that you give special consideration to the following items, should you be asked to revise your paper, or should it be accepted for publication.

Title: The title should accurately and specifically reflect the subject matter addressed in the paper. Do not use mathematical symbols or equations in the title unless absolutely necessary.

Abstract: Abstracts are often reproduced, separate from the body of the article, in review journals and in electronic search facilities. Many readers will decide whether to read your article based on the information contained in the abstract. Thus, the abstract should be brief (150 words or less), but should accurately summarize the contents of the paper. Specifically: indicate the conclusions reached in the paper and the possible applications of the research performed; avoid using mathematical equations; do not cite references by number.

Key words: This list should reflect the main ideas and concepts addressed in the paper.

AMS subject classifications: This list is especially useful to readers engaging in electronic searches. Please give all relevant classifications. These can be found in our net or in the annual "Subject Index" of Mathematical Reviews, and can be searched electronically through the American Mathematical Society's World Wide Web server, <http://www.ams.org/>.

TeX Information: If your paper is accepted for publication, JMRA will ask you to supply a LaTeX2E (preferred), TeX, or AMSTeXfile for your paper. You will receive more information from JMRA at that time and will be asked to apply JMRA's style macros to your LaTeX file. For information on JMRA's macros please visit <http://jmre.dlut.edu.cn>. Note that JMRA cannot accept electronic files produced on any other typesetting or word processing system.

Color illustrations: JMRA journal is printed in black and white, with art printed in color only when it is deemed by the editor to be scientifically necessary. If it is your wish or expectation that any of the figures in your paper appear in color in the printed version, please inform us immediately.

Color art that is not deemed scientifically necessary by the editor can be printed in color at the author's expense.

Reference: References should be cited in the text using Arabic numerals within square brackets in order of appearance, and listed at the end of the paper in numerical order.

Journals: Reference number, surname(s), initial(s), article, journal, year of publication, volume, relevant page numbers:

[1] Dongli CHEN, Chunhui MA, Wenfa YUAN. *The nonstandard characteristics of filter convergence and its application*. Pure Appl. Math. (Xi'an), 2004, **20**(1): 10--13.

[2] T. D. BENAVIDES, G. L. ACEDO, Hongkun XU. *Iterative solutions for zeros of accretive operators*. Math. Nachr., 2003, 248/249: 62--71.

[3] Ruyun MA. *Nonlocal Problems for Nonlinear Ordinary Differential Equations*. Science Press, Beijing, 2004. (in Chinese)

Book: Reference number, surname(s), initial(s), title, place of publication: publisher, year

[4] W. K. HAYMAN. *Meromorphic Functions*. Clarendon Press, Oxford, 1964.

If a publication is in press, the reference should be made as complete as possible, with the name of the journal stated and indicated "in press".

Following is a list of relevant JMRA publications personnel. Feel free to contact us with any questions or problems.

Contact Huadong YU (jmre@dlut.edu.cn), Director of Editorial Office :

1. for information on the status of papers in review;
2. to notify JMRA of change of contact information.
3. with general requests;
4. about problems with the review process;
5. for Editorial Board information;
6. with questions concerning page charges or reprints.

Contact Xiangyang XIAO (jmre@dlut.edu.cn), Composition Specialist:

1. with technical questions about JMRA's TeX, LaTeX, or AMSTeX macros.

Telephone: 86-411-84707392

E-mail: jmre@dlut.edu.cn

Address of the editorial office: School of Mathematical Sciences, Dalian University of Technology, Dalian 116024, China.

Fax: 86-411-84708354
